UI Developer with 5 years experience identifying, designing, and developing web based solutions. Recently designed and developed an IRA administration platform which increased staff efficacy by 60% and improved client satisfaction through the introduction of a responsive self-servicing portal. Looking to leverage my skills to implement high quality user centered UI solutions.

Experience

UI/UX Developer | Rocket Dollar | Nov. 19' - Present

- Conduct user interviews and usability testing to document issues within existing applications.
- Present findings and solutions to stakeholders.
- Redesign UI to address issues with functionality, UX, and responsiveness.
- Develop new features using JS, React, and REST services.

Software Engineer | Rocket Dollar | Jul. 18' - Nov. 19'

- Developed company site using HTML, CSS, JS, and Hubspot
- Created company design system to provide uniform customer experience across product and marketing.
- Collaborated with stakeholders to deliver web pages, assets, and products in conjunction with projects and timelines.

Head of Account Management | BlueCheck | Aug. 16' - Jul. 18'

- Led team of 3 account managers responsible for implementation, merchant success and satisfaction.
- Implemented workflows for managing and servicing 700+ clients across 6 ecommerce platforms.
- Liaised with clients and development team to identify, report, test, and fix application bugs and new features.
